

## Carpet Cutter Drill Guide

- **Serrated blade edge** cuts with one-handed twisting motion.
- **Drill guide** eliminates carpet snags, or “snow-ball” effect.
- **Pass-through design** accommodates up to a 7/16" drill.
- **7/16" by 8" drill bit** is available.

### DESCRIPTION

The perfect helper for installing drop cable, the 4375 Carpet Cutter and Drill Guide bores a clean hole in a carpet and serves as a drill bit guide to prevent carpet snags and snowballs while drilling through underlying wood flooring. Cable Prep is the leading manufacturer of carpet cutters for drop cable installation.

### APPLICATIONS

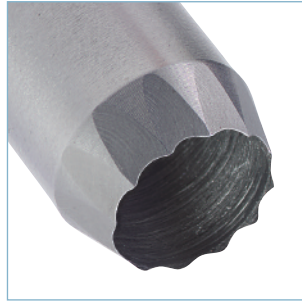

The 4375 Carpet Cutter produces perfectly round cuts by hand in any floor carpet. The drill guide accommodates up to a 7/16" bit and protects the carpet while drilling through sub-flooring.

# Carpet Cutter Drill Guide

## SPECIAL FEATURES

### Serrated Blade and Ergonomic body:

The hardened steel serrated blade cuts easily through carpet and pad with a one-handed twisting motion, eliminating the need for a hammer. The blade produces a carpet plug that can be replaced without detection should the drop location change. A knurled body ensures a firm grip on the cutter, and a safety cap protects the blade when not in use.

### Pass-through Drill Guide:

The drill guide accommodates up to a 7/16" drill bit. Using the guide eliminates the dreaded "snow-ball effect" caused by snagging carpet threads.

## ORDERING INFORMATION & SPECIFICATIONS

Item	Part Number	Weight (Ounces)	Weight (Grams)
Carpet Cutter and Drill Guide	4375	12.5	354
Replacement Blade for Carpet Cutter	4375RB	1.6	45
